

Data Center Briefing

June 07, 2026

global

Key themes:

AirTrunk proposed US\$30 billion / 5GW India buildout by 2030, only ~600MW contracted; AirTrunk's verified base is ~600MW Lumina pipeline across Mumbai, Chennai, Hyderabad; STT GDC acquires Repro India's 14,093 sq m Mahape parcel for ₹282 crore; STT's Navi Mumbai cluster: 28.4 MW live plus 48 MW and 42 MW under development

There is a difference between a press release and a backlog. AirTrunk's June 5, 2026 newsroom statement that it "plans to invest more than INR 3,000 billion (US\$30 billion) in India by 2030" ([AirTrunk](#)) is official at the company level — not trade-press echo — and India's Prime Minister's Office amplified it the same day, noting plans "to invest around Rs. 3 lakh crore (\$30 billion) in India and develop 5 GW of data centre capacity" ([PMO](#)). But the same release leans on conditional language — "plans to invest," "proposed investment program," "currently being considered" — and the only contracted base underneath the 5GW headline is the ~600MW pipeline across Mumbai, Chennai, and Hyderabad inherited via the April 2026 Lumina CloudInfra acquisition ([AirTrunk](#)). The gap between a verified 600MW and an aspirational 5GW is the whole story.

- [AirTrunk's \\$30bn / 5GW India plan is official — and still proposed](#) - Blackstone- and CPPIB-backed AirTrunk frames the program as a "proposed investment program... currently being considered," anchored by a contracted ~600MW Lumina base.
- [STT GDC buys Repro's Mahape parcel for ₹282 crore](#) - Repro India's BSE/NSE filings confirm the 14,093 sq m Plot No. 50/2 transfer in MIDC Mahape, Navi Mumbai, completed via Assignment Deed on May 22, 2026.
- [AirTrunk's only contracted India base is 600MW](#) - the April 20, 2026 Lumina release pegs the planned portfolio at ~600 MW with up to US\$5 billion of

future development potential.

- [PMO amplifies the AirTrunk number](#) - central-government awareness confirmed, but no state MoU, land allotment, or capacity allocation tied to the 5GW claim was published.
- [Robin Khuda met Maharashtra and Andhra Pradesh ministers](#) - AirTrunk confirms market engagement, not committed projects, in either state.
- [STT's Navi Mumbai cluster keeps growing](#) - STT lists Navi Mumbai 1 at 28.4 MW operational, plus 48 MW and 42 MW under development in MIDC Mahape, making redevelopment of the Repro parcel the likely intent.
