US Data Center Daily Briefing

September 08, 2026

KEY THEMES

- HyperVault/TCS secures 264 acres in Hyderabad for up-to-1-GW AI campus
- TCS filing sets ₹70,000 crore capex with TPG as strategic partner
- YEIDA Master Plan 2041 defines dedicated data-centre zoning near Noida airport
- ADB signs first India advisory mandate for Madhya Pradesh Shajapur solar-storage PPPs

TCS confirms HyperVault's 264-acre, up-to-1-GW Hyderabad AI campus in a BSE filing

Tata Consultancy Services told the exchanges on September 5, 2026 that its subsidiary HyperVault has secured 264 acres in Hyderabad for an AI data-centre campus of up to 1 GW. HyperVault and its partners expect to invest up to ₹70,000 crore. TPG is named as strategic partner, and the build-out is described as phased, tied to customer demand. Four numbers now sit on a company filing rather than press commentary: land, capacity, capex, and phasing.

- TCS confirms HyperVault's 264-acre, up-to-1-GW Hyderabad AI campus – the BSE filing sets a ₹70,000 crore investment envelope and names TPG as strategic partner, with build-out staged to customer demand.
- YEIDA Master Plan 2041 carries a dedicated data-centre land-use category – the Yamuna corridor's Phase-I plan allocates 6,605.91 hectares to industrial use and defines an "Industrial Plot (Data Centre)" zoning class near the Noida airport.
- Solis's Chennai solar-plus-BESS install pairs 870 kWp PV with a 500 kW / 1,044 kWh battery – the official post frames it as behind-the-meter self-consumption and diesel offset for an IT facility, not a hyperscale template.
- ADB signs its first India transaction-advisory mandate with Madhya Pradesh – the bank will structure three renewable PPP projects, including a Shajapur solar-plus-storage facility, targeting up to $1 billion in private investment.

Track any ISO, state, county, or company in the US data center build-out — Telborg tracks power, permitting, new projects and legislation exclusively from trusted sources
