Putin launches Rosatom battery manufacturing cluster

Vladimir Putin announced the launch of a new Rosatom electric battery manufacturing facility in Moscow as part of Russia's national energy storage industry push. He said the new facilities could help Russia meet most domestic battery demand by 2030 and support the power grid and data centres.

Google has announced a new collaboration with Constellation Energy to add 890 MW of nuclear capacity to the PJM grid and deploy Gemini Enterprise to help optimize plant operations. The company says the deal supports upgrades at six nuclear plants and brings its total enabled U.S. nuclear capacity to over 1.5 GW.
