MHI launches certified 10MW chiller for AI data centers

Mitsubishi Heavy Industries has announced that its 10MW-class centrifugal chiller, the JHT-Z270I, has received ETL-Listing and AHRI certification for commercial deployment in the United States. The product is positioned for AI data centers as part of MHI's Power, Cooling, and Energy Management portfolio.

Banca d'Italia Governor Fabio Panetta opened the Green Swan Conference 2026, saying climate resilience requires better risk understanding, risk-sharing and adaptation. He cited more than USD 200 billion in 2025 extreme-weather damages, Italy's compulsory disaster insurance for firms, and the growing resource demands of data centres.
