Moldova plans continued gas and power market liberalization

Moldova’s energy minister said the country will continue liberalizing its gas and electricity markets in 2027 while deepening grid interconnections with Romania. He also cited the energized Vulcanesti–Chisinau line, the signed Balti–Suceava contract, and a $130 million U.S. grant for the Straseni–Gutinas line.

South Africa anchors 5200MW nuclear expansion on science

South Africa’s Department of Electricity and Energy says its nuclear expansion will be assessed on science and evidence, while Eskom has submitted a feasibility programme for a 5200MW nuclear energy plan aligned with IRP 2025. Minister Kgosientsho Ramokgopa said the proposed determination will be opened for public participation and procurement will follow once it is published.

UK funds Royal Navy Atlantic Net to counter Russian threats

The UK has announced a £90 million investment and framework with Ocean Infinity Solutions to develop Atlantic Net, a new Royal Navy surveillance capability using drones, sensors and AI. The programme is part of Atlantic Bastion and is intended to help protect undersea cables, energy networks and the UK’s deterrent posture.
