EU promotes industrial carbon management and CO2 storage

The European Commission has published an article outlining how industrial carbon management can help the EU cut hard-to-abate emissions and scale CO2 transport and storage infrastructure. It cites the Yara Sluiskil project in the Netherlands, which began capturing carbon in September and is expected to handle up to 800,000 tons of CO2 annually, with EU funding support for cross-border infrastructure.

St. Kitts and Nevis explores EU geothermal and cable cooperation

The Government of St. Kitts and Nevis said it is exploring EU-backed cooperation on geothermal energy, a new undersea fiber-optic cable, and regional sea links. The plans include drilling six geothermal wells in Nevis and developing a power plant, with no price figures disclosed.
